

WELCOME TO SHOWDOWN

Showdown is the ground-breaking new racing game from legendary arcade game publisher Sega and racing specialists Codemasters, the team behind 2010's hugely successful GRID arcade racing game. Showdown delivers arcade thrills and full contact racing in every event, each an electrifying festival of energy, speed and destruction that demands repeat play.

Players will fully commit on every corner and overtake as they take on spectacular circuits set across the world. Showdown's tracks are littered with obstacles, pinch points, multiple-routes and ramps to deliver action-packed, white-knuckle action in each and every race. Players are fully immersed in the action with the game's stunning graphics, a huge curved display and ground-breaking pivot motion technology. An all-new handling system makes the game both accessible and rewarding for the player as they dive into a new world of motorized mayhem bursting with speed, style and destruction.

SHOW TIME

Showdown Special Attraction is a combination of ground-breaking new technology and years of expert experience in video game cabinet design, delivering striking looks and an experience like no other!

Marquee

Showing off the four cabinets in style is this amazing attraction marquee. When fully lit and running Showdown TV, these bespoke cabinets will be the main attraction in any location.

Showdown TV

These two huge HD displays show player's real time reactions, so spectators feel like they are part of the action. Whilst in Showdown TV's demo sequence, the display shows off the game's sensational on-track action to attract new players.

Curved Screen

A super wide curved screen creates the most realistic and immersive game experience possible for the player.

Pivot Motion Seat

Feel the experience of drifting, crashing, overtaking, performing takedowns, landing jumps and boosting like never before.

Authentic Dashboard

The authentic dashboard has real working dials, buttons and a fully functional radio.

Online Leaderboards & Unlocks

Showdown takes advantage of Sega's exciting new online portal 'Sega Scores'. At the end of a game players are presented with an onscreen QR code that when scanned with a smartphone takes them to segascores.com.

Here they can see their ranking for that cabinet, location and region, as well as their overall position on the global leaderboard. They can brag about their skills via social media and get awarded new unlocks in game. When a player uses a code and unlocks a new feature, they are given a new code with the new item added to their previous collection. This expands the Showdown experience for the player and encourages repeat play.

FACTS

Exterior Specifications

- New bespoke cabinet design
- Translucent rear fascia panels
- Bold artwork throughout the cabinet
- Signature LED lighting

Interior Specifications

- Stainless steel floor fascia panels
- Fully functioning radio
- High performance 5.1 surrounds sound
- Over 100 inch Hybrid Laser LED Projection display
- Force feedback steering
- Driver adjustable pivot motion seat
- Optical safety sensors
- Motion Stop button
- Authentic automotive warning lights
- Player face camera
- Stainless steel unlock code keypad
- Authentic dashboard with stainless steel effect, fully working dials, toggle switch and engine start button

Dimensions

- Overall Depth - 2225mm / 87.60in
- Overall Width - 9300mm / 366.14in
- Overall Height - 2857mm / 112.48in

FEATURES

Pivot Motion Technology

By incorporating this unique motion technology, Showdown breaks new ground in motion based video game racing and will set the standard for immersion in the genre. The pivot based motion system of Showdown propels players from side to side, creating a unique sense of G-Force. With this technology in place, players will feel the full force of drifting, crashing, overtaking and more like never before. Showdown features the perfect gameplay to demonstrate this incredible new technology.

Curved Screen

Showdown incorporates the latest in display technology, using state of the art Hybrid Laser LED Projection Technology. Gameplay is displayed on a unique curved screen, immersing the player in the very heart of the action. With the player's eyes equidistant to the 32:9 super wide ratio screen, it creates the most realistic and immersive gaming experience for the player.

Authentic Dashboard

Every aspect of the game has been designed with the player in mind – to captivate, thrill and heighten their senses each time they sit in the driver's seat. The authentic dashboard features real working dials, buttons and a working radio, suitably titled 'Wreckage Radio', featuring licensed tracks that perfectly complement the on track action. It's all designed to immerse players in the unique, exciting and competitive world of Showdown from the moment they sit down to play.

All images are computer generated renders, final product may vary.

MODES

Showdown features four distinctive game modes to conquer.

DEMOLITION

A closed arena map where the aim is to take out opponents by smashing, bashing and shunting them to oblivion. Powered by Pivot Motion Technology, Showdown arcade brings demolition derby alive like never before.

CROSSROADS

Race on classic figure of eight circuits, where it's full-on carnage in cars at the track's intersection points.

RACE OFF

A no holds barred, wild racing event where it's a fight to the finish line by any means necessary. Show your opponents who is the true king of the road by smashing them off it as you sprint for the checkered flag.

KNOCKOUT

Push pedal to metal and drive it like you stole it as you knock out opponents from the top of the platform, and try to stay on top yourself. Use boost to deliver crunching T-Bone crashes or dash out the way of incoming hits.

LOCATIONS

Showdown is all about showing off and features some truly iconic and compelling locations to experience its unique brand of all-action racing. Players will feel the heat in Miami, get wrecked in San Francisco and turn up the style in Tokyo. Gamers can also hoon around the dangerous docks of Yokohama, smash through the snow in Colorado and get lairy in Los Angeles. It's a wild world of racing.

ENVIRONMENTS

Each Showdown race is a raucous event where high energy racing meets high impact destruction. Amplifying this core gameplay experience, a party atmosphere surrounds each circuit – crowds in the thousands cheer the drivers on and react to the action as it unfolds. Fireworks and lasers flood the sky, planes buzz the track and many more environmental effects help create a celebratory, festival vibe for each and every event.

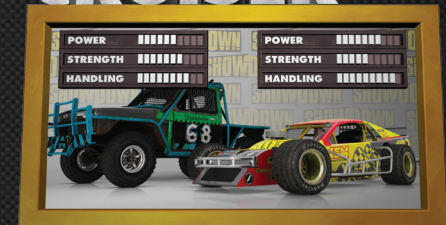

CARS

Ten car classes featuring twenty cars - from muscle cars and pick-up trucks to sports cars and even hearses – means there's a ride to suit every driver's desire! Each has its own strengths, weaknesses and character, so players can choose their favorite or conquer them all as they take on Showdown's different race events.

INSPIRATION

For the Showdown design team, the goal was far more than simply to create a new cabinet, but to take the arcade racing experience to a whole new level, in the driving seat and beyond. Taking inspiration from the real world of racing, a driver's helmet - an iconic piece of racing equipment which symbolizes speed, thrill-seeking and life on-the-edge - provides the form for this striking cabinet. The result is a dramatic piece of design that invites players to get fast and furious in a new world of racing and demands attention from any passerby.
